Headquarters	Wardha, Maharashtra, India
Founded by	Dr. Mahendra Kshirsagar
Global Reach	Asia · Middle East · Africa · Latin America
Certification	WHO-GMP & internationally benchmarked standards

Our Journey

Genetek Lifesciences Pvt. Ltd., headquartered in Wardha, India, was established with a clear mission: to deliver healthcare solutions of uncompromising quality that are both accessible and affordable. From our early beginnings in sterile injectables, we have steadily expanded into advanced contrast media, critical care formulations, and nutraceutical products — areas that directly impact patient safety and well-being.

Genetek Lifesciences was founded under the leadership of Dr. Mahendra Kshirsagar, whose foresight and dedication continue to guide the company. With a distinguished career in the pharmaceutical domain, Dr. Kshirsagar envisioned an organization that would balance world-class manufacturing with genuine social responsibility.

“Healthcare should be a right and not a privilege.”

This philosophy remains at the core of our operations. Through his vision, Genetek Lifesciences has transformed from a promising domestic manufacturer into a trusted global name, known for its integrity, quality, and patient-centred approach. Under his mentorship, the next generation of leadership is now steering the company towards even greater global milestones, ensuring that innovation, responsibility, and care remain our defining pillars.

Today, Genetek Lifesciences is recognized as a reliable partner across international markets, with regulatory approvals spanning Asia, the Middle East, Africa, and Latin America. Our growth reflects not only our scientific capabilities but also our steadfast commitment to compliance, ethical practices, and global standards such as WHO-GMP and other internationally benchmarked frameworks.

What Sets Us Apart

Our Story

Founded by Dr. Mahendra Kshirsagar with a goal to make quality healthcare globally accessible. We began with sterile injectables and now offer a diverse product range, driven by a commitment to patient-centred care.

Our Values

Integrity builds trust, Quality ensures safety, Innovation drives purposeful solutions, and putting People first keeps our mission focused on human well-being. They are the heart of everything we do.

Our Mission

To make quality healthcare a universal right — by expanding globally, introducing new therapies, and innovating for affordability and sustainability. We are building a healthier tomorrow for all.

Our Strength and Teamwork

Skilled Team, Trusted Products, Global Presence

Genetek Lifesciences Private Limited has played a pivotal role in developing and marketing contrast media products and critical care products in the Indian market and export markets. A competent team of experts from various disciplines — Research & Development, Quality Control, Quality Assurance, Pharmaceutical Manufacturing, and Engineering — has helped Genetek achieve a premium position in the domestic and international contrast media and critical care pharma product segments. Our specialization in project management, product development, technology transfer, engineering design, validation, and regulatory compliance enables our team to produce world-class products consistently.

Members of Genetek have vast experience gained from working hands-on within the regulated environment of the pharmaceutical industry. This gives us a unique blend and breadth of experience across technology, engineering, and regulatory disciplines — allowing us to understand current and future needs. Team Genetek has the experience to understand market needs, the expertise to achieve them, and the vision to excel.

Genetek's products, manufactured in a GMP-certified, state-of-the-art plant under the most stringent conditions, are well accepted among medical professionals nationally and internationally. The company has large capacities — for manufacturing ampoules, vials, FFS ampoules, and bottles — to meet the demands of the domestic market.

Our Product Portfolio

Contrast Media	Diagnostic imaging formulations supporting accurate, safe patient care.
Injectables	Sterile injectable formulations manufactured to stringent quality standards.
Liquid Orals	Oral liquid formulations for a range of therapeutic needs.
LVP Injectables	Large volume parenteral products for critical care applications.
APIs	Active pharmaceutical ingredients supplied to global manufacturing partners.

Our Services

Contract Manufacturing Services	End-to-end manufacturing partnership backed by regulatory and quality expertise.
Packaging Solutions	Reliable, compliant packaging tailored to product and market requirements.
